

EurProBiol

The title of Professional Biologists in Europe

ECBA registers and represents professional biologists in Europe.

The EurProbiol title may be awarded to a biologist who fulfils the following criteria:

- is a member of a national organisation of biologists recognised by ECBA and/or
- has a recognised academic qualification
- has agreed to abide by the European Professional Biologist Code of Conduct

Biology is a rapidly developing science which offers considerable contributions to a sustainable society in major areas like health, environment, food and energy for future generations.

ECBA recognises that biology is a living science, a continuum from classic academic science to being a cornerstone for a prosperous future.

ECBA represents biology at an international level and is the European organisation concerned with current and future biology. It does so from a strategic viewpoint, in close association with its members. Additionally it cooperates in matters at a national level although national issues remain the responsibility of national bodies.

ECBA will inform, safeguard, stimulate and communicate with modern biology.

ECBA supports the development of a sustainable society by progressing all aspects of biology, old and newly discovered, including established and newly establishing biological disciplines, in a balanced fashion, and presents them in a clear and comprehensible manner to end users in industry, politics and academia as well as to the general public.

ECBA operates in primary and secondary education, academia and professional fields of biological sciences, for example at the level of biotechnology, molecular biology, synthetic biology, botany, entomology and medical biology.

ECBA provides the Professional Biologist's European qualification, the EurProBiol title, an EU standard

ECBA is administered by a Council of delegates from member associations; the Council is held annually to discuss policies and develop strategic plans.

ECBA has Commissioners who engage in activities in professional fields designated by the Council. These Commissions act upon relevant issues in Europe on behalf of ECBA

ECBA is composed of national Biology associations representing over 800.000 biologists in EU countries

Where no relevant National Biology Association exists ECBA supports the founding of an association or can act in its place, temporarily.

EurProBiol
EUROPEAN PROFESSIONAL BIOLOGIST

The EurProBiol title is a professional designation for European biologists.

All title holders are professional biologists with a proven record and competence.

All title holders have a sound academic biology background and at least three years of relevant experience.

Title holders are registered in the EurProBiol register. The register is available at www.eurprobiol.eu
